this book is designed to help schools deliver effective training in curriculum mapping creating and using curriculum maps is easy when this in depth resource is used in workshops curriculum means and professional learning communities

this absorbing history of the ordnance survey the first complete map of the british isles charts the many hurdles map makers have had to overcome the guardian uk map of a nation tells the story of the creation of the ordnance survey map the first complete accurate affordable map of the british isles the ordnance survey is a much beloved british institution and this is amazingly the first popular

history to tell the story of the map and the men who dreamt and delivered it the ordnance survey s history is one of political revolutions rebellions and regional unions that altered the shape and identity of the united kingdom over the eighteenth and nineteenth centuries it s also a deliciously readable account of one of the great untold british adventure stories featuring intrepid individuals lugging brass theodolites up mountains to make the country visible to itself for the first time

i was born in the years of the baby boomers at this time it was the years of segregation we were poor people if one would compare those times to today now we would have been considered poor but no one knew it then as everyone in the community was in the same state odd being if my family didn t have certain food or ingredients for their meal we could go next door and get it the same would be true if the people next door needed something to complete their meal they could come to our house and if we had it we would give it to them there were separate water fountains on the streets side by side however they were labeled colored only and white only one day as i was on the street alone i drank from the white only fountain i found that the water was the same as was in the colored only fountain as people had jobs without them knowing it the jobs were a form of legal slavery the workers had not been out of the community to discover that they were being paid wrong when i got older and graduated from high school i left home to attend college i found that this was true and tried to let the black workers know the white owners of the businesses told the black people not to listen or talk to me as i was a troublemaker there were many black athletics in the area but we were not allowed to play on teams with the white boys as we were not smart enough to compete with them until they were going to other communities to compete with other white teams then they wanted us as they found that by using us they would win

just as the term design has been going through change growth and expansion of meaning and interpretation in practice and education the same can be said for design research the traditional boundaries of design are dissolving and connections are being established with

other fields at an exponential rate based on the proceedings from the iasdr 2017 conference re research is an edited collection that showcases a curated selection of 83 papers just over half of the works presented at the conference with topics ranging from the introduction of design in the primary education sector to designing information for artificial intelligence systems this book collection demonstrates the diverse perspectives of design and design research divided into seven thematic volumes this collection maps out where the field of design research is now from software engineering to information design yvette shen most academic methodologies are developed from a prescribed methodological process that is limited to a specific area of study however the disciplinary landscape in which the knowledge is established is being rapidly reconfigured given the vast varieties of practices and knowledge base required from information designers it is even more crucial for them to look outside of the traditional visual design fields and seek diversities for better research and creation methods the two disciplines software engineering and information design are often perceived as one provides technical solutions to the other this essay intends to move beyond the common perception and identify relevant issues in software engineering design that resonate with the information design process the issues include the multi component planning approach the human oriented agile method design concepts such as abstraction decomposition component modularity hierarchical relationship and extensibility the perspectives from software engineering design and information design is examined through units of analysis terminology explanations and forms of communications the collective design methods and principles provide a systematic framework to the methodological thinking in information design the discussion serves the purpose of encouraging more conceptual based conversations between information design and other disciplines especially in the fields of science and technology designing information for artificial intelligence path recommendation and user acceptance in a virtual space jong myoung lee kyung hoon hyun in this study the authors propose two information layout strategies informative layout and decisive layout that influence the user acceptance rate on recommended information the informative layout is the degree of descriptions in the recommendation process the

decisive layout is the degree of choices in recommendations thus the objective of the paper is to discover how users acceptance of a recommendation changes when the recommendation is displayed in different degrees of informative and decisive layouts to this end we have conducted the following tasks 1 sophisticated software was created with javascript to conduct experiments with users online 2 experiment subjects n 247 with various education and demographic levels were recruited 3 user acceptance rate depending on the information layout strategy was collected 4 the relationships between information layout strategy and user acceptance of the recommended information were computationally analyzed the results of the study indicate that the information layout strategy proposed in this research significantly influences user acceptance of the recommended information also this research identified effective combinations of informative and decisive layouts to maximize the user acceptance the research on design framework for citizen science zhiyong fu jia lin lu wang citizen science is a process in which ordinary citizens contribute to scientific research how to create citizen science design framework to achieve better awareness initiative and action is our research focus this paper will explore citizen science design in the context of smart city on the basis of activity theory and by means of digital social innovation smart city concept provides new elements including social communication collaborative design and innovative community to citizen science with the rapid development of science and information and communication technologies icts and with the arrival of 2 0 social innovation is endowed with digital factors so as to be evolved to digital social innovation dsi which gives various design perspectives on citizen science and also plays an important part in establishing citizen science evaluation model in this paper a citizen science design framework consisting of citizen science content model design model and evaluation model is proposed by discussing related theories models and citizen science cases it acts as not only design lead to inspire two citizen science case practices but also an evaluation term in the view of citizen science the framework and models developed in this research will hopefully be leveraged and refined to support citizen science design in the future finding the expectations of smart home and designing the meaningful technology for delivering

customers satisfaction yaliang chuang lin lin chen yu shan athena chen smart home is becoming a focus in both literature and product development practices the current study employed a human centered design approach to understand users desires and expectations from their living context six critical themes were developed via in deep interviews field observations and data analysis they are housed as a supportive friend atmosphere generator theme songs for every moment coordinator and reminder life memory collector and routine builder for young generations those concepts were partially integrated to define the value proposition for the target user group of parents with young children this guides the design ideation and video prototyping to illustrator the user experiences through a focus group discussion the design concepts were validated with six potential customers the results also show that the design concept has the potential to motivate children s behaviors help to build their routine and has the flexibility to fulfill different needs toward the changes of the family s life cycle using frame analysis to organize designers experience on the cloud julija naskova this paper demonstrates how goffman s frame analysis is applied in a research on designers experience with cloud based digital tools at the base of goffman s structure is the primary frame in this case designers experience with computer based digital tools these tools transition to the cloud initiated by business are called fabrications goffman s structural issues in fabrication such as retransformations and the nature of recontainment are also discussed through contemporary examples these fabrications are used or keyed by active agents from various design fields the data collected showed different levels of understanding of cloud technology and the application of various tools in everyday design practices thus the interviewees were clustered into three groups designers developers and artists their experiences form the creative technology and experimental frame derived from keying of the primary frame design researchers can selectively borrow elements from frame analysis complex structure to build an effective user experience narrative un intended value implications of graphical representations of data milena radzikowska stan ruecker the design of meaningful graphical objects to represent collection items must balance the following amount of useful information that can be communicated through the object s graphical form

meaningful graphical difference between individual items or groups of items and restraint in form complexity to allow for the simultaneous display of numerous collection items at a small size how the user interprets difference and sameness and more importantly whether the user attaches hierarchical value to the emergent categories may play a significant role in determining whether that user focuses attention on one set of data over another on one set of processes over another and ultimately on one set of tasks over another this paper examines the significant consequences for the understanding of the user resulting from representation of data files and other objects in a human computer interface hci and proposes that new approaches may be indicated given the growing complexity of what is being represented and how what is represented can be used mapping communication design through the giulia de rossi paolo ciuccarelli design is by nature an interdisciplinary dynamic and fluid discipline to define what design is has proved to be a very difficult if not impossible and meaningless exercise making also the understanding of the evolution of both the design discipline and practice a complex challenge a rapidly changing technological landscape increases the breadth of design both in geographical terms and by extending to new domains merging with different and new disciplines communication design especially being closer to the information and the media spheres is the most sensitive and receptive design area communication design finds online a fertile ground for its growth and developments thus the online environment and the especially can be explored dug and mapped as mirrors of that evolution the aim of our research is to map through the the complexity of the intersections between design as a discipline and design as a field of practice our exploration and representation of the online design territory covered four online environments behance wikipedia google and the websites of the top 100 design universities the study has been conducted by using digital statistical and visualization methods this exploration seeks neither to confirm theories nor predict the future rather it wants to make explicit and observable what communication design has become today it aims to screenshot the state of the art the emerging paths in order to understand where and how it is going to develop the attempt is to make design as a complex phenomenon visible through the

construction of a set of maps and representations for professors students and associations these representations are tools to trigger reflections on the discipline and the profession bringing a contribution to the experimental research in this field a content analysis of wired magazine and self tracking devices serefraz akyaman living in a modern society is becoming more complex so in order to keep up with a person should accomplish various kinds of task at once daily life requirements obligations and the capacity of human memory lead us to collect and control our behaviors bodies and lives through self tracking devices aim of this paper analysis of emerging digitalized self tracking trend through content analysis of wired magazine wired magazine both in printed and online monthly publish technology related articles how emerging technologies affect culture the economy and politics it reaches more than 30 million people each month through wired com digital edition since the term quantified self emerged for the first time in wired magazine for this reason wired magazine is one of the most important sources to be used for content analysis this present study carries out a content analysis of all the issues until december 2016 through self tracking and two other related terms quantified self and lifelogging the usage period and popularity of these terms and the relation network with the main topics and the subtopics are examined as a result it is possible to define wired magazine as a medium in which industry academia and users come together and feed each other reciprocally wired magazine has contributed significantly and continues to contribute to the development of the digitalized self tracking trend in terms of its content interaction design and use innovation for interactive products geehyuck jeong james self product use innovation is a means to facilitate the design driven innovation approach we explore how the mode of use concept may apply to state of the art product interactions to enhance user experience and provide opportunities for design driven innovation within the interactive product space to achieve this we apply taxonomy of interactions to classify interaction styles as along the two dimensions explanatory or exploratory and discrete or composite adopting the research through design approach two interactive mood lamps were developed and expressed as high fidelity prototypes these were then used as stimuli to evaluate the influence of interaction

style on product experience results indicated the touch free magic interaction style an interaction providing explorative and composite modes of interaction was initially considered more innovative in terms of use however participants also expressed negative emotions related to dissatisfaction and embarrassment toward the touch free magic interaction due to an inability to intuitively understand the use functions implications for the application of use innovation within the interactive product context are finally discussed study of the implementability of tactile feedback while operating touch panel device from two directions of efficacy and feasibility jien wakasugi masayoshi kubo in a few years the number of apparatuses with touch panel displays like smartphones will increase people who are visually impaired hearing impaired and disabled can use tactile feedback for receiving incoming communications however opportunities for tactile feedback applications are limited our hypotheses follow as there are haptics patterns suitable for use cases we will design haptics samples of tactile feedback and inspect their effectiveness this study focuses on haptics patterns showing a relationship between the user s impression and various use situations previous studies have been insufficient so our target subjects inspected a limited number of objects this study consists of two inspections we collected various haptics patterns that users had defined and analyzed the first inspection for the next inspection we manufactured a smartphone prototype we matched the impression of eight haptics patterns types that we got from the subjects in the first analysis with different situations and tested various replies tests were repeated and recorded for various situations as different haptics vibrations were added to e mails we inspected whether subjects could distinguish a difference in their meanings thus we added different haptics patterns that corresponded to various situations we concluded the hypothesis was effective for subjects we could inspect the hypotheses in relation to subjects impressions of the haptics pattern additionally we obtained different results between elders and youths consequently we suggested design guidelines for the new tactile feedback of the smartphone application we suspect that haptics will be possible for a variety of interactive designs sensory reflection toward product design ideation pratiksha prabhakar heekyoung jung vittoria daiello as humans information processing

abilities have become more and more disconnected from their senses due to an increasing quantity of abstract information so have design processes there is a demand for designers to include human sensation as part of engaging product forms and experiences this qualitative case study explores the role of senses and their potential use in design ideation a literature review of related theoretical and pragmatic perspectives and a survey of 15 20 product examples that provide unique sensory experiences are analyzed and sorted through four sensory design strategies sensory augmentation conversion transition and isolation using the four strategies as core concepts a sensory reflective framework with a mindful focus on sensory appreciation and translation is proposed to support designers ideation in creating unique product forms and experiences the paper reports the process and findings of a sensory ideation workshop which was conducted based on the framework and further discusses the development and implications of the framework in supporting designers sensory ideation

coaching teachers and leaders to greatness research shows that coaching is the best way to bring about robust change in both instructional and leadership practices coaching becomes evocative when it is a person centered strengths based model grounded in adult learning theory focused on growth designed as a companion to both evocative coaching transforming schools one conversation at a time 2nd edition and evoking greatness coaching to bring out the best in educational leaders this guide will allow coaches to reflect on their learning and put evocative coaching strategies into practice readers will learn how to follow the lead listen emphasize appreciate design process to become a partner in professional learning engage in coaching conversations as they develop evocative coaching skills through various activities that invite reflection develop instructional coaching and leadership skills that foster innovation this interactive guide is meant to be used by participants of an evocative coaching workshop members of a book study group or plc a self study reader or anyone who wants to coach teachers and leaders to greatness

Decoding OSIS: Understanding its Meaning and Usage in Medical Terminology

This article aims to clarify the meaning and usage of the abbreviation "OSIS" in medical terminology. While not a standalone term itself, "osis" is a suffix widely used to denote a condition or disease. Understanding its function is crucial for accurate interpretation of medical reports, diagnoses, and conversations. We will explore the significance of this suffix, examine its application in different medical contexts, and provide illustrative examples to enhance comprehension.

The Significance of "-osis" as a Suffix

In medical terminology, "-osis" functions as a suffix signifying a condition, usually an abnormal state or disease process. It generally implies an increase, an abnormal accumulation, or a morbid process affecting a specific organ, tissue, or system. Importantly, "-osis" does not inherently indicate the severity or the specific cause of the condition. It simply points to the presence of an abnormality. This is in contrast to suffixes like "-itis," which specifically denotes inflammation.

Application of "-osis" across Different Medical Specialities

The versatility of "-osis" is evident in its widespread use across various medical specialities. Its meaning subtly varies depending on the root word it is attached to, but the underlying theme of an abnormal condition remains consistent. Let's consider a few examples: Osteoporosis: This combines "osteo" (relating to bone) with "-osis". Osteoporosis signifies a condition characterized by decreased bone density, leading to increased fragility and fracture risk. The "-osis" signifies the abnormal condition of weakened bones, not the specific cause (like calcium deficiency or hormonal imbalance). Psychosis: Here, "psycho" refers to the mind, and "-osis" indicates a mental condition characterized by a loss of contact with reality. Psychosis encompasses various symptoms, such as hallucinations and delusions, but the suffix simply highlights the presence of the disturbed mental state. Nephrosis: This term combines "nephro" (referring to the kidney) with "-osis". Nephrosis typically denotes a kidney disorder involving damage to the glomeruli (filtering units) leading to proteinuria (protein in the urine) and edema (swelling). The "-osis" describes the pathological change in kidney function. Cystinosis: This combines "cystine" (an amino acid) with "-osis." Cystinosis is a rare genetic disorder characterized by the accumulation of cystine crystals in various organs, notably the kidneys and eyes. Again, the suffix "-osis" indicates the abnormal accumulation, not the underlying genetic defect. Chondromatosis: This refers to a condition where abnormal cartilage formation occurs, often leading to the development of multiple cartilaginous nodules. "Chondro" relates to cartilage and "-osis" highlights the abnormal proliferation.

Distinguishing "-osis" from other Suffixes

It's crucial to differentiate "-osis" from similar suffixes like "-itis" and "-oma." While "-osis" implies an abnormal condition, "-itis" specifically indicates inflammation. For instance, "arthritis" (arthro - joint, -itis - inflammation) points to inflammation of the joints, while a condition like osteoarthritis might include degenerative changes in addition to inflammation. "-oma," on the other hand, typically denotes a tumor or swelling. For example, a lipoma is a benign tumor composed of fatty tissue.

Practical Implications and Clinical Significance

Understanding the meaning of "-osis" allows healthcare professionals and patients to better interpret medical reports and engage in informed discussions. For instance, a diagnosis of "hyperparathyroidosis" (hyper- excessive, parathyroid - parathyroid gland, -osis - condition) directly indicates an overactive parathyroid gland resulting in an excess of parathyroid hormone. This knowledge helps in guiding further investigations and treatment strategies.

Conclusion

The suffix "-osis" serves as a vital component of many medical terms, consistently indicating the presence of an abnormal condition or disease process. While not specifying the cause or severity, its consistent usage provides a foundation for understanding various

pathologies across diverse medical specialties. Accurate interpretation of this suffix is crucial for both healthcare professionals and patients to effectively communicate and manage health conditions.

Frequently Asked Questions (FAQs)

1. Is "-osis" always indicative of a serious condition? No, the severity associated with "-osis" varies greatly depending on the specific condition. Some "-osis" conditions are relatively mild, while others are life-threatening. 2. How can I tell the difference between "-osis," "-itis," and "-oma"? "-osis" indicates an abnormal condition, "-itis" signifies inflammation, and "-oma" typically refers to a tumor or swelling. 3. Can "-osis" be used to describe a temporary condition? While many "-osis" conditions are chronic, some may be temporary or episodic. 4. Are there any common treatments for conditions ending in "-osis"? Treatment approaches vary drastically depending on the specific condition. There is no universal treatment for all "-osis" conditions. 5. Where can I find more information about a specific "-osis" condition? Consult reliable medical sources such as medical textbooks, reputable websites (e.g., Mayo Clinic, NIH), or consult with a healthcare professional.
